## WE MAKE MUSIC (and you can too)

With an excellent series of 16mm color films from FILM ASSOCIATES.

- each is a new approach to the study of music.
- each film is devoted to a single musical instrument and its family.
- each film follows a similar pattern.

The performing artist explains the history of his instrument, how it evolved and developed. Instrumental techniques are clearly demonstrated. The series, intended for the student, illustrates the story of musicianship, analyzed and broken down to its finest components, then re-assembled to form the complete story of those who make music.

This series and the DISCOVERING MUSIC series are both available on a preview with a view to purchase basis from CFI. Brochures describing these films in detail are available from our FILM SERVICES division.

THE REAL SECURITY - 24 min. - col.

A motivational film for every executive, supervisor, salesman or other responsible employee to develop his own "real security" - by becoming a growing man in a growing organization.
